TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL, TypeScript

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets, Microservices

Database: MongoDB, PostgreSQL

Cloud and Devops : Docker, AWS, Git, GitHub, Postman, Linux

Core CS : Data Structure , OOPs , OS , DBMS

AI/LLM : Claude API , OpenAI API , Gemini API

EXPERIENCE

Full Stack Developer Intern

June 2025 – Aug 2025

ITPlusPoint — Hybrid

- Developed a **multi-tenant SaaS finance management platform** using the MERN stack, enabling organizations to manage petty cash, major expenses, revenue tracking, and transaction workflows through **40+ secure RESTful APIs with JWT, middleware-based authorization, RBAC (Super Admin/Admin/Employee), and Two-Factor Authentication (2FA)**.
- Built interactive financial **analytics dashboards using Chart.js**, optimized backend performance with **MongoDB aggregation pipelines** and well-structured database schemas, and **integrated Cloudinary for secure storage and management** of invoices, receipts, and financial documents.

PROJECTS

Real-Time Virtual Camera Tracking And Simulation System - [MERN] [Live Demo](#) | [GitHub](#)

- Developed a real-time **full-stack simulation system using React.js and Node.js** for configurable camera-target tracking, supporting moving beacons, motion patterns, noise and platform disturbances.
- **Engineered WebSocket-based telemetry streaming** for target coordinates, tracking status and performance metrics, **integrating OpenCV-based detection and Kalman filtering for continuous target tracking**.

AI Powered Healthcare Triage with Doctor Recommendation System [Live Demo](#) | [GitHub](#)

- Developed VEDA-AI, a full-stack **healthcare platform enabling rural patients to describe symptoms through voice or text**, perform AI-driven early medical triage, **recommend doctors based on specialization and availability**, automatically **trigger emergency alerts for high-risk cases**, and support multilingual healthcare interactions.
- Engineered secure RESTful APIs with middleware validation, **integrated Anthropic and Gemini LLMs** for medical report generation and simplified doctor responses, and implemented the Web Speech API and i18next to improving accessibility and simplifying doctor-patient communication.

EDUCATION

2025 – 2027 **Master of Computer Applications (MCA)**

Trident Academy of Creative Technology

2022 – 2025 **Bachelor of Science in Information Technology**

BJB Autonomous College

ACHIEVEMENTS AND CERTIFICATIONS

Hackathons

Participate 5+ hackathons by building innovative AI-powered solutions that **addressed real-world challenges** using modern full-stack technologies and collaborative development.

Certification in Introduction to Model Context Protocol (MCP) - Anthropic
